Xtra Opaque Low-Bleed inks are high-opacity, multi-purpose inks that are designed to produce extremely opaque prints, yet are very easy to print on a manual press. The smooth, creamy consistency leaves an even, uniform print on white flash bases and can be applied on both front and back. The fast flash speed allows for shorter dwell times and easier production output.

WOW is a high-opacity, low build-up ink line, designed specifically for wet-on-wet printing. Ideal for high-volume print jobs, allowing for longer press runs, fewer interruptions, no screen blockage, fewer misprints and less cleaning. These are opaque inks that produce clean, brilliant colors. Also, WOW inks are Non-Phthalate, gaining international approval from environmental groups. New to this series are our ALLSTAR colors, a group of industry standards.

QMX is a high-opacity, wet-on-wet, versatile mixing system. The system consists of 7 colors plus a clear. Due to its texture and printability, higher mesh counts may be used, resulting in a very smooth finished product. The ink is very soft, smooth and exhibits excellent printing characteristics, making it a perfect choice for quick turn-around jobs or where a smooth, even finish is desired.

Xtra Opaque Low-Bleed inks are high-opacity, multi-purpose inks that are designed to produce extremely opaque prints, yet are very easy to print on a manual press. The smooth, creamy consistency leaves an even, uniform print on white flash bases and can be opaque on black without a white surface, and contain clean, bright pigments. The fast flash speed allows for shorter dwell times and faster production output.

WOW

WOW is a high-opacity, low build-up ink line, designed specifically for wet-on-wet printing. Ideal for high-volume print jobs, allowing for longer press runs, fewer interruptions, no screen blockage, fewer misprints and less cleaning. These are opaque inks that produce clean, brilliant colors. Also, WOW inks are Non-Phthalate, gaining international approval from environmental groups. New to this series are our ALLSTAR colors, a group of industry standards.

QMX

QMX is a high-opacity, wet-on-wet, versatile mixing system. The system consists of 21 total components: 19 colors plus a clear base and a white base. That is all that's required to mix over 1000 colors. The ink is very soft, smooth and exhibits excellent printing characteristics, while producing a very smooth printed finish. Due to its texture and printability, higher mesh counts may be used, resulting in soft hand finishes. QMX is designed around the PANTONE® color guide. PANTONE® is the world wide guide for graphic artists. It is on all major software systems, i.e. Adobe® Illustrator®, Adobe® Photoshop® and Corel Draw®. Wherever art is generated, PANTONE® colors are likely to be specified.

SPECIALTY INKS

QCM offers a wide range of specialty inks. From our ever popular MTL Precious Metals to our Glow-in-the-dark, Gels, Adhesives and Softee inks.
